WORD BANK · BACK OF THE NOTEBOOK

Vocab goes in the back, with the page it came from

No free pages after Section 1, so the word bank lives in the back, right before the question bank. Each line: word · page it's on · 3–5 word meaning. Cover the right side with your hand to test yourself.

📌 Where it lives

Back pages	What
Last 6	Question bank (as before: Q left page, A facing page)
The 4 before that	**Word bank**. ~22 lines a page × 4 = ~90 words. Enough for the whole course if you follow the rule below.

Mark the boundary now: a sticky tab or a big “WORDS” on the first word-bank page, so you never write a lecture into it by accident.

✍️ The rule: only words you didn't know

- My PDF vocabulary pages have 20–25 words per lecture. **Do not copy them all.** Copy only the ones that were new to you. For most lectures that's 5–8.
- Meaning in 3–5 words, not a sentence. The PDF has the long version; the notebook has the trigger.
- Page column = the spread where the word is used. Flip there when the short meaning isn't enough.
- Group by section with a little header line, so it stays findable without an index.

🔁 How it earns its keep

- On every +1 / +3 / +7 review: cover the meanings, read the words, say each one out loud. 2 minutes.
- A word you miss twice → a question card in the question bank.
- A word you've nailed three reviews in a row → put a tiny ✓ in front of it and skip it next time. The list shrinks as you learn, which is the whole point.

⚡ The list on the left is my pick of the words most likely to be new, with page refs blank for you to fill. Cross out any you already knew.
